"Yesterday our new shed was delivered and we are simply thrilled! We do a lot of research before making purchases and this was no exception. Now that we have our building we know that the quality that was promised is the quality that we received. We are so pleased and will be recommending Wood-Tex to anyone we know who is looking for a shed."

Shed Specifications

Delivery Preparation

The **BEST** and easiest way to level a site is to have a base of #2 crushed stone 4 to 6 inches deep leveled and tamped. This allows for good drainage underneath the shed and packs together well for a solid, long lasting pad. **This is the pad we recommend using.** Base preparation is entirely up to the customer and Wood-Tex cannot take any responsibility for damage caused by unlevel or inadequate pads. **We DO NOT recommend placing our sheds on blocks. Blocks settle unevenly and do not carry the weight properly.**

Wood-Tex has manufacturing facilities in New York and South Carolina, with delivery available nationwide! We offer FREE delivery the first 100 miles from our manufacturing facilities on ALL models and sizes!

"Just wanted to let you know how happy we are with the shed that was delivered this morning! What a cool process to see it taken off the truck and put into place--my kids and the neighbour's kids loved it! We'll certainly be recommending your business to anyone who asks! Thanks again!"
